Intelligent, active, playful kitten in need of an affectionate home where she has indoor/outdoor access. She is a grey and gold tabby, answers to the name Opal (because of her eyes). She has an appointment on July 16 for her distemper and rabies shots and a revolution treatment (so she is flea and worm free.) On August 5 she has an appointment to be spayed. Finally on September 15 she will receive her feline immunodeficiency and feline leukemia vaccines. I am not asking money for her, just a good home where she can live indoors and outdoors. She also has a brother and adopting the animals together is a big plus as they are very.
