Have you ever wanted your script made into a film? Is it appropriate for a low budget film (meaning no large special effects, etc. like a Avengers, Star Trek, etc.)? Bad Wolf Productions is now accepting submissions of of low budget film treatments/synopsis (no more than 10 pages in length) ONLY of your script. We will select from the treatments/synopsis that we receive which scripts to request. Not all submissions will receive a request to read the full script. All scripts requested must be for a film length of thirty (30) minutes. This is for our first film, so there will be no pay for the script but your name will be included in credits, etc. We will only read treatments/synopsis at this time and they must also be submitted with a release form, or the treatment/synopsis will not be read. Please respond to this post if interested and we will send you the release form and more information.
We can also be found on Facebook at https://www.facebook.com/BadWolfPro
