If you are a HVAC, Roofing, or Residential Painting, General contractor or have any kind of contracting service to offer then this is for you. It can be hard to gain customers in a competitive market and that is where we come in.

We give you leads for FREE once we set up your profile which is also FREE! No start-up fees, no monthly payments, no contracts, and no cancellation fees. The way it works is like this. 1. A customer that needs a service will put in a request through our app or website. 2. If that customer is within your chosen service radius, then you will get a call from our automated voice service telling you what the customer needs done, and what area they are in. 3. If you don't want the job you simply hang up and there is no charge. If you do want the job then you just press 5 and you are immediately connected with that customer free of charge. The only time your card is ever charged the flat rate is when you and the customer have a legitimate business conversation. It's that simple.

The flat rate is between $13-$25 depending on what type of service you provide. Let's say we give you 20 leads in a week and you only listen to 10 and talk business with 3 people, you are then only charged for the 3 people you talked business with. If you are unable to service the customer then you are not charged. Also when you do make contact with a customer, no other contractor will have access to them but you. If you would like more information then just email me with your email and/or phone number and I will get back to you as soon as possible thank.
