

EngineTranny SWAP SETUPS LS (1 USD)

Location **Vermont**
<https://www.genclassifieds.com/x-569297-z>

Chevy LS engines setup for swaps into older hot rods. I set these motors up for the harness and pcm to work in whatever application you want to put them in. I can also get trannys but not at the \$1400 price but please read below. What I do is order in motors as they are needed and get them setup with a stand alone harness that's a 4 wire hook up to make ur motor run and drive. I then reflash ur PCM to take out the Vats, rear o2s, egr, and anything else not needed. These are complete full pull motors that comes with all the front accessories, starter, maf, and manifolds. they also come with flywheel. Motors come with warranty and are guaranteed to run or will get you a replacement motor. All harnesses have a lifetime warranty and same with computer flashing. I can get different engines and different setups so the price will vary on what you would like. here is a list of what I offer. all motors are around 100k and less.

Check us out at www.Jsswapshop.com or look us up on FB and like are page and enter in the code found on FB when ordering for \$50 dollars off any motor/tranny package.
