"Stella" is Legend Lime Green with Custom Paint and graphics performed by Bob Thrash. Bob has worked with Rad Rides by Troy, Chip Foose and is currently working with Andy Leach . . . Owner at Cal Automotive Creations. Bob has had much influence in the design and fabrication of many high end award winning vehicles. Google him . . . you will be impressed!

In 2006, Bob Thrash approached me with an offer to customize the look of the car. He was eager to create a new graphic for the 2005 redesigned Mustang. Bob drew a loose rendering of his vision of a Roush Mustang. The results speak for themselves.

This beauty is truly show car quality!

Included, is a digital scrapbook of Bob at work, the progress of the installation, as well as a copy the

---

artist's rendering.

The major mechanical upgrades were performed at Rod Baker Ford in Plainfield, Illinois (Roushcharger, suspension, shifter linkage). This original stock 4.6L 3V Engine is no slouch at 300hp. Installing the Roushcharger, high boost pressure pulley, cold air intake and Roush off road mufflers makes this beast a force to be reckoned with boasting approx. 450hp. The Roush suspension upgrade is truly amazing, improving handling, stiffness and stability through turns, lowers vehicle by 1" and handles 1.0g lateral on skid pad. I must add that this car has never been on the dyno or the TRACK!

Stella is Jack Roush at his best! She attended Jack Roush's outings in Lavonia, Michigan where Jack signed the radiator cover and dash. Included will be digital pictures of Jack signing the dash as well as pictures of the outings.

Stella is a head turner. From her sleek lowered stance, beautiful subtle graphic designed stripes that flow seamlessly from front to back to her powerful Super Charged 4.6L V8. She has attended auto shows and cruise nights, winning many accolades. Don't miss out on your chance to own this one of a kind Mustang GT/Roush Stage 1 Custom
