large multi family new construction flooring company is hiring experienced, clean, prompt, legal tile installers for our apartments. This is a sub position. There are few openings and they will go fast. You must have a drivers license, vehicle insurance, and tax id # or able to obtain one. If you cant follow the most simple basic installation instructions dont bother calling. I need a few crews that can be given materials and instructions and work without headaches. I cant babysit or train you so if you cant handle the fast paced world of apartments dont apply. You must be able to help with reaching deadlines. The current project has 25,000 sq ft of 6x6 tub surrounds @ .95 cents sq ft. And the backsplashes have 6600 sq ft @ 1.50 sq ft. I would like to give this work to a good installer who can handle it all. These jobs are osha so proper attire is required. We do have more projects about to start and will be needing more crews than we currently have so for the right individuals this is a chance to quit running around every day and wondering if you have work next week. This is a chance to get established and have more work than you can imagine. Do not call if you cant do more than 8 tub surrounds a day. I cant afford slackers or newbies. I will spot you the first day and you will be gone. So dont waste your time or.
