Hello dear readers,
my friends and I are searching for a place where we can live. Preferably we would like a two bedroom in which case there will be two females and two males. Otherwise there will be three males and two females if a three bedroom is found. The females are college students where as the males mainly only work. We are all responsible young adults with jobs, we can and will pay our bills on time. With us comes pets which is where this is difficult. There will be two cats or depending on the situation they may be re-homed although we hope to prevent this. One of the females in our group is from Texas and plans to have her dog brought up, which happens to be a Pit-bull. Therefore we are currently attempting to find a place which will allow pets without prejudice. Seeing that it is hard to have a meet and greet of the dog due to the fact that it currently is not in Alaska we also need a landlord who will be open minded. The dog is crate trained as well as housebroken, up to date on vaccinations and minds very well. We have been searching but it seems too difficult therefore we have decided upon this ad in order to attempt to get some leads. If there is any information that anyone can give it would be greatly appreciated and we hope to hear from you. Have a wonderful.
