

Earthwise 20 (12 USD)

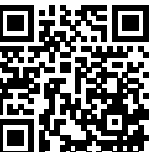

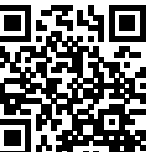

Location **Connecticut**
<https://www.genclassifieds.com/x-570358-z>

Only used this for three years. Runs great, cuts the grass evenly and is not loud. Has the bag that came with it. Can be used to mulch, side discharge or bag. \$135 obo.

Manufacturer's description:

Earthwise 20" Corded Electric Mower with Bag. NO gas to buy. NO pull starting. NO fumes. NO maintenance. There are dozens of reasons why an electric mower is just plain superior. But in the interest of time, I'll break it down: you get all the power and performance of a gas-guzzler in a quieter, lighter, cleaner, and easier-to-use Mower. No harmful fumes, no fuel / oil mixing, no maintenance. Everything about the Earthwise is simpler and better, from the one-lever height control, to the easy push-button starting, even the no-tool assembly! Perfectly groomed: 12-amp system provides all the power you need, even for thick or especially high grass; 3-in-1: easy controls let you go from side discharge, to mulch, to rear bag; Single lever height control, from 1 1/2-4"; Easy-rolling ball bearing wheels handle rough terrain without a problem... 8" rear, 7" front; Comfortable V handle with cushion grip and soft-touch operation; Handle-mounted safety blade control; 20" cord, uses standard 120V power supply.

With 3-in-1 performance that allows you to choose between mulching, bagging, or side discharge, plus a powerful 12-amp electric motor that provides zero-emission performance, the Earthwise 50120 Corded 20-inch Electric Lawnmower with Grass Bag is a versatile, and easy-to-use mower. The single-lever height control, easy on/off mulch plug, and handle-mounted safety-blade control provide enhanced performance, ease of use, and safety.

performance. With wide 20-inch coverage, your lawn will require fewer passes, which will save you both time and effort.

Navigating tough, uneven terrain is made easy by the composite seven-inch front wheels and eight-inch rear wheels that feature ball bearings for better maneuverability and longer life. And the V-handle with cushion grip offers greater control over tough terrain and provides comfort. A nice bonus, the handle folds down to make storing your lawnmower easy.

Single-lever Height Control for Easier Adjustments

Instead of having to adjust each wheel when changing the height of the mower blade, the Earthwise 50120 Electric Mower features a single-lever height control system that makes it easier than ever to adjust the height of the cut. You can choose between seven height positions, ranging from 1-1/2 to four inches.

Single-lever height control is just one feature that makes the 50120 so easy to use. Other ease-of-use features include a handle-mounted safety-blade control, an easy on/off mulch plug for mulching, and a special cord hook for managing the power cord during operation. Additionally, no tools are required for assembly. Simply hand-tighten several components and you're ready to go!

Innovative 3-in-1 Design for Added Versatility

Outperforming other mowers, the Earthwise 50120 Electric Lawnmower is three mowers in one, functioning as a mulching mower, a side discharge mower, and a rear bag mower. As your lawn changes throughout the spring, summer, and fall, the 50120 will adapt to your yard's varied needs. You can mulch your grass in the spring to help thicken the lawn, or you can use the bag to clear leaves and debris in the fall--the choice is yours!
