"I did state that the New Deal was different, different in that they demand that the Point Of Sale Collect and Store that Data for them - Not that they want to stop Spying on the people but that they have to hide it differently! "

I call bullshit!

First, Obama made it clear as far back as 2008 that national surveillance programs needed more oversight. In 2009 he used executive orders and Justice Dept administrative rules to stop the GOP's extrajudicial domestic spying programs (which Republicans promptly objected to) and in 2010 he signed into law the Intelligence Authorization Act for Fiscal Year 2010

Second, the Democrats in the House crafted that bill, H.R. 2701 which did specifically that:
https://www.opencongress.org/bill/hr2701-111/show
224 Democrats voted for it
172 Republicans voted against it
The Republicans fought against oversight to prevent privacy abuses against US citizens.

"you continue to Blame someone other than the Democrats who are simply in as deep as any Republican!"

The "blame" lies squarely with the Republicans. This new 2015 bill that Rand Paul filibustered was sponsored by Republicans. 196 House Republicans voted for it. No matter how you slice it, parse it, or lie about it, the right wing crazies and Corporatists are mostly responsible for it.

It's always the fault of provincial, ridiculous fauxbros here lies to us.
