Have an 02 explorer , bought it a little over a year . It has over 200k. But I bought a newer flex fuel engine and had it put in about 4 months ago. It is not flex fuel though , I kept everything original and just put regular injectors back in newer engine that had little over 100k on it when we purchased it. Has a jasper tranny. Third row seating. Everyday driver. Now for the list of cosmetics and little stuff it will need. The part that changes heat from cold to hot went out this summer. So it is stuck on cool. But air doesn't work. Hasn't since I've owned it. All power windows work except front passenger. It will work sometimes. Also been this way since I've owned it. And the hatch is an off color because my wife backed into a truck and busted the window so I took one off another explorer. But this thing runs and drives excellent. 4x4 good. Just put over a 1000 alone replacing seals and gaskets with engine swap. Only selling because my wife found another vehicle she.
