

Juvi BLUE IGUANA (St Paul)

Location **Minnesota**
<https://www.genclassifieds.com/x-571390-z>

Juvenile blue iguana, TRUE blue, NOT blue phase. Approximately 4-6 months old. Eats like a champ, healthy. Has not been handled much due to size, so he is flighty. The first pic, the top iggy is the one I purchased! The other 2 are examples of the beautiful color. I purchased him in early May from Mike Lloret Reptiles in Florida, and he is captive bred. Has been under UVA/UVB lighting. Includes 30"x16"x16" screen cage, full spectrum lighting, infrared heat lamp, all lights, cool gnarly wood, fake plants etc. You MUST have prior iguana experience as he will get BIG and needs full spectrum lighting, with bulbs replaced every 6 months ideally. \$200 FIRM for iguana only, \$250 for everything. Serious inquiries.
