A Caretaker's responsibility is to provide general care and security for the home and property while it lies vacant, or general maintenance or property care while the owners are in residence.

In this role, the caretaker will keep the house safe, well-maintained, and well cared for. The best individual will continually be on the lookout for problems and be ready to call repair workers when they spot trouble. This individual will actively care for the home and property.

Responsibilities:

• Home maintenance including: general contracting of electrical work, appliance repair, carpentry, snow plowing, septic care, roof work, pest control, plumbing, chimney sweeping, and painting. It may also involve some minor housekeeping or lawn care.

• Responsible for house checks (however frequently the employer desires), as well as checks for property damage after storms or extreme weather, and will have personal contact with the alarm company should the security system be activated. They should be well-equipped to handle such a possibility.

• The Caretaker is often responsible for preparing the house for the "homecoming." They may arrange for a part-time house cleaner or carpet steam cleaner, wax floors, polish silver, clean or replace windows, arrange for fresh flower arrangements, grocery shop, trim outside foliage, and anything else required to allow their

employer to feel relaxed and comfortable from the moment they step into the property.

MUST have at least 5 years experience doing this type of work in large homes.

Are legally employed in the U.S.

Are hard working and efficient
