I know you're out there; don't delete this ad. The marijuana industry is like the wild, wild west, and I'm like Buffalo Bill, and I'm looking for Annie Oakley. Annie, you get an office on the water, a percentage, and your job is to get slathered in the most incredible skin care product to ever come down the pike, and to smoke weed all day long. We are a capitalized start-up working on a tight budget but the plants are looking good.

There is real work involved; we run an ordinary business as well. You must be highly motivated and extremely passionate about medical marijuana, A component of the plant has the most incredible benefits ever for skin care, so we are specifically looking for a woman who can be comfortable with people scrutinizing her skin. You will have better skin, this is a truly jaw-dropping product.

We will be doing a full service state licensed code kitchen for edibles and extracts, and even supercritical CO2 solvent pair extractions.

Please don't expect me to write you back to request a picture and more information, I simply don't have the time..
