DATA RECOVERY

Can't find your data? Was it there when you left last night and gone in the morning? Do you think your hard drive crashed? Let us help! We can probably recover your data and through our Computer Forensics services find out if it was due to a security breech.

COMPUTER FORENSICS

The simple definition of Computer Forensics is a technological, systematic inspection of the computer system and its contents for evidence or supportive evidence of a crime or other computer use that is being inspected. Computer forensics requires specialized expertise that goes beyond normal data collection and preservation techniques available to end-users or system support personnel. We at ST LOUIS COMPUTER TECHS utilize Forensic tools that are top of the line in the industry. If you are trying to find out who did what with the data, if it's there we can find the fingerprints that could close the case.

Our trainers are certified and have been through the certification process. We possess titles such as MCT,MCDBA,MCSE + Security, MCAD,MCTS-SQL2005, C|EH,C|EI,Security +,Network + and the list goes on. We understand what you need to know for the tests and can help prepare you for success! Not only can our trainers prepare you for the exams, we can tailor make a test taking road map to achieve the certification status you desire quickly while not compromising integrity.

Dell and Sony VAIO Certified laptop / notebook PC repair: repair screens, motherboards, cracked cases, broken keyboards, and any other hardware-related problem. We are highly skilled and knowledgeable with and have years of experience with working on laptop/notebook PC repair. I replace motherboards, screens, hard drives, repair broken, worn out power cord jacks, upgrade memory (RAM), upgrade hard drives, and do just about all types of hardware-related work on laptop/notebook PC's. You will be working with a true IT professional / IT technician who not only has certifications, skills, and experience, but one who is very thorough with his work and emphasized on quick turnaround and personalized service to you, the customer. I have also worked on many other different brands of laptops, including HP, Compaq, Sony VAIO, Toshiba, Acer, Lenovo (IBM), Macbook and other Mac laptop/notebook models, and many other commonly used laptop/notebook brands and models. We have worked on and repaired just about any brand of laptop / notebook PC that is popular. In addition, we also work on desktop PC's, servers, and do networking for residential and for business. If interested in these other services, please inquire.

KEEP IT GREEN
Usable systems find a new home;
Usable parts get put to good use; and,
the stuff that can't be reused ends up in the recycling stream instead of a landfill!

I can take

Computer Towers and Internal Components (Working or Not)
Laptops (Working or Not)
LCD Monitors (Working or Not)
Printers Inkjet or Laser (Working Only Please)
Old Hard Drives (Working or Not - Any Existing Data will be Destroyed)

Used or Unneeded Print Cartridges - Inkjet or Laser Toner

I cover a wide area... In and around St Louis. I always try to consolidate trips,
so I may not be able to get yours 'now' or even today, but I will get is as soon as possible
by appointment.

If I say I'm going to be there, I am going to be there... I don't do no shows.

Initial contact by e-mail please

Thanks for reading and keep it green!
