I have a nice gaming computer for sale!

Custom built

Intel i7 quad core 3.4ghz
Nvidia Gtx 570
1000w power supply
Liquid cooling
Blue ray burner/player
2tb hard drive 16gb of ram

Also comes with a Logitech g600 mouse (just like razer naga)
I do not have a monitor for it but have one you can test it on to be sure it works.

I have played skyrim/wow on it at max setting at over 100fps

This thing is a powerhouse, I just need money to
