

## Let me do your work and get you an A in your online courses (Online)

Location **Virginia** https://www.genclassifieds.com/x-573096-z

If you're taking statistics, math, or physics, and are ready to rip your hair out in frustration, let me save you. I can do all the work for you and get an A. This is 100% professional and confidential, and I will not judge you in any way. I understand that some people struggle with math-based subjects more than other people, and I want to help you so that you can focus on the classes you enjoy that apply to your major. And the best part is that you never have to pay anything until after the work is complete!

I can help with most undergraduate levels of physics, statistics, and mathematics, including algebra, geometry, trig, and calculus. If you're struggling to understand confidence intervals, hypothesis testing, and all that other stuff in your statistics class, then drop me a line. You can email, text, or call me at

## tutor / tutoring

Takahashi was especially enthralled with an American group called the National Council of Teachers of Mathematics, or N.C.T.M., which published manifestoes throughout the 1980s, prescribing radical changes in the teaching of math. Spending late nights at school, Takahashi read every one. Like many professionals in Japan, teachers often said they did their work in the name of their mentor. It was as if Takahashi bore two influences: Matsuyama and the American.
