Will be back in the area mid-August (In Germany) and I'm looking for like minded individuals who would want to jam/start something along the lines of the mentioned title. I love making soundscapes, odd noises, everything that encompasses the various things I like. Some bands I've been influenced from over the years are like: the strokes, yeah yeah yeahs, R.E.M., modest mouse, Blur, The Antlers, The National, the Beatles, and many many more.  
I'm familiar with music theory but prefer to write things more simplistic, melodic and atmospheric, with a good hook and vibe.  
I'm not looking for people who are the best of the best or highly experienced, just ones who can consolidate a small thought or idea into something legit, real and grand.

\*\*if you've sent me a message, I'm pretty sure I've responded to everyone who has sent one, so please check your junk mail as there are some I would be interested working with.\*\*  
  
Thank you for your
