Local rock/country band doing covers and originals is in a sudden need for a replacement bassist. You read the title right starting in September we are filming a pilot for a tv show for CMT. You must be available August 20-24 to go to nashville to record 2 of our original songs that will be featured on the show. This is a permanent position and the recording of the 2 songs will require you sign with us to the record label that's publishing them. This is a serious busy working band with tons of shows for now mostly on the weekends. We are looking to tour so you must be available and open to that. Think about all of this before you contact us as we do not any flakes. You must have serious equipment and chops. You must be between 21-35 years old. If you contact us and we give you an audition, do not show up wearing bike riding goggles and assless chaps cuz you will be turned away at the door. I repeat we are looking a serious bassist. Band is a bunch of guys that are easy going and laid back but we take this seriously. We get drunk as fuck but not at shows so were looking for a like minded individual. Guys from the band are all from md. De. And Pa. We practice in Pa. With all that said and you read this and think you've got what it takes to apply you can contact us via email or call or text me at

Have a great one y.
