

Participants needed 50 Years and Older (Ft. Worth)

Are you or a loved one at risk for a dangerous healthcare-associated infection commonly known as C.diff?

Clostridium difficile infection (CDI) symptoms range from mild diarrhea to life-threatening bowel disease and often include dehydration, abdominal pain and spasms. Volunteers are needed for a research study evaluating the effects of an investigational vaccine for the prevention of CDI episodes in at-risk individuals.

Individuals who are age 50 or older and planning hospitalization of more than 72 hours for surgical procedures and/or who have had at least two hospital stays, each lasting more than 24 hours, and have received systemic antibiotics in the past year, may qualify to participate.

To learn more and find out if you or a loved one are eligible to participate, call 817-348-0228 or visit www.Cdiffense.org.
