

Need handyman (Trolley Square)

Location **Delaware** https://www.genclassifieds.com/x-586826-z

My current issue is a dishwasher that won't fill with water. I've had this problem before and it was a five minute job having to do with the pipes to the sink, but plumbing companies charge a fortune just to come through the door. I have an old house needing other small, odd jobs, like my sliding back door that just got stuck shut. So I'm looking for an affordable handyman that I could call when these things come up. The most immediate issue is the dishwasher.
