

Autism Research Study in Visual Perception (Massachusetts Inst. of Technology (MIT)

Location **Massachusetts**
<https://www.genclassifieds.com/x-587276-z>

How does your brain process visual information? How does attention change how you see? We would like to invite you to participate in our research project investigating visual perception in people with Autism Spectrum Conditions.

Who is invited to participate?

To participate in this study, you must be 16 years of age or older, have a diagnosis of Autism, ASD, PDD-NOS, or Asperger's syndrome. Parental permission required if you are under the age of 18.

What will the study be like?

You will be asked to participate in an fMRI brain scan, take visual tests on the computer, view fun visual illusions, and complete questionnaires (4 hours total). You will receive \$100 for your help, reimbursement for your travel to our research center at MIT, and a picture of your brain.

How do I volunteer?

To find out more, please contact Dr. Robertson by email at or visit: www.carolineerobertson.com/volunteer-for
