Howdy,

I'll get right to the chase- Denver has an open mic for every night of the week at various clubs (in which, I almost never participate); for one night only, my favorite hangout spot is hosting such a night (for open mics), in one month.

What I want to do is play 2 or 3 original songs on a 6 string guitar... all I need is feedback, or help with lyrics or music.

If you're funny and/or you know your way around a few chord progressions, please write back.

I can do this on my own, but any help would be greatly appreciated
