

Need Trash Compactor installed (West Fork)

Location **Arkansas** https://www.genclassifieds.com/x-624948-z

I need someone to install a new trash compactor for us in our kitchen. It will need to go into the existing cabinets next to our sink. There is an electrical plug next to it so that part will be easy.

You must have done this type of install in the past to get the job. References would be appreciated. Please give me a quote. If you need to see the cabinet and trash compactor first just let me know.

I already have the compactor onsite.

Thank you in advance for your quote.
