Brand new Timex IRONMAN One GPS+ watch. Never taken out of original packaging. I won it in a marathon but it doesn't have triathlon features so I plan on using the money to go toward a Garmin triathlon watch.

Perfect for runners who want to track their runs, pace, map, and link up with other runners. It has Strava, music, GPS and a whole lot more. Apparently you can allow people to track you while you run too. Seems great, just not what I need.
