I have 3 sections of dog ear type section fence that I had hung on my old fence at last house hung onto the front gate that separates the front from the back yard. I have the straps that kept it hooked on my other fence at the old house that could be used . Will need to get some parts for it (needs wheels/casters on the bottom to make it easier to open because of added weight, will need a latch on both inside and outside and 4 cheap handles - nothing fancy). The panels will have to be cut to fit the front gate. . Please don't just leave a email saying you'll do it- please leave me a price as well. Thank you. Here is a picture of the panels of fence that I have when they were up at my old home and a picture of the gate I need it hung on. I had this posted on here before we moved but now we are in home and need to get it done. Thank you for your.
