

American Fuzzy Lop Bunny (1 baby left) (Zumbrota)

Location **Minnesota**
<https://www.genclassifieds.com/x-626030-z>

Hi there,
 I have baby cuties looking for their forever homes. They are pure bred American Fuzzy Lops, which means they will get very fuzzy! They are "wool/angora" producing bunnies, so they could be used for spinning on the side of being a wonderful companion animal. They won't get very big, their parents both weigh 3 lbs each.

These bundles of love are handled daily, possibly a little too much! They love to be snuggled in your arms and especially love to give kisses just like their mama. The fuzzy lops are 4 weeks old at the moment. The American Fuzzy Lop Babies are showable. Pedigree included for an extra \$10.

Bunnies are 6 1/2 weeks old. Pictures take at 4 weeks old.

Now be aware these bunnies will grow into adults. They will not look nor stay this size forever. Rabbits take a responsible owner to give them proper care and a happy life. They need daily exercise outside of cage if they stay in one. Please do your research before you bring a rabbit into your life. They can live 10-12+ years, so they are a commitment. And finally, they need love and attention...every single day. Simple as

There is 1 bunny that is still available:

1.) Chestnut Male (in picture) \$50
