

need a foster for mangy pup (Biloxi)

Location **Mississippi**
<https://www.genclassifieds.com/x-626228-z>

Found two dogs. both nearly hairless from sarcoptic mange, not the inherited type. Looking for some nice animal lover willing to foster the pup and find it a home when she's healthy. I have too many dogs already. I can deal with the older one but the pup is a little rambunctious, pushing me over my threshold. She is about 12 weeks old, 20lbs and 15 inches or so tall. Looks like a pit mix, light brown, extremely happy and friendly. No issues with food or other animals. Loves being indoors, fairly well behaved. I have already dipped her once and she can be dipped again in two more weeks. I also have plenty of dip to provide. Hoping someone will step up to the plate and help save this pups life. I know if she goes to the shelter, they don't have space to allow her time to.
