

# I am stuck on a project VBA Excel (Elk Grove)

Location **Illinois**  
<https://www.genclassifieds.com/x-626301-z>

I am stuck on a project for a form converting Imperial to Metric and Metric to Imperial  
I can do the conversions, and that works fine. but I want a progress meter showing vbmodeless that will show close to actual progress if not actual progress for the lengthy cutting, pasting, and removing of zero's from the result. I am having a brain fart on this and I just know someone can help me out on this real quick.  
This is a freebee to my customer so I can't pay that much for this and I'm sure it's 10 minutes work for the right person.  
I need this asap and can send payment through paypal or mail a gift card whatever we agree on.  
Who is a VBA expert out there ????? I can mail the excel spread sheet if you agree not to disclose any of it.  
or I can show you my desktop with teamviewer etc.
