This is one of the best speakers for electric bass and has been for forty years. This may have been reconed but it was done over thirty five years ago. Nonetheless, it was done quite right. The speaker sounds great. This cone has a crack and was repaired. It seems to be fine and I've used this speaker on a couple of gigs like this with no problem whatsoever. It's possible it's still only 150 watts at 8 ohm as these were originally made. Call or
