128,000 miles. ORIGINAL OWNER. NON-SMOKER. Excellent condition. Seats 7. This van has always been in a garage at night. Corrosion treatment was done at purchase and undercarriage looks great. Leather seats, power driver seat, heated front seats. Cruise control. Traction system for in the winter. Audio changer and volume control on the steering wheel. Power locks, power windows and power vents. Electronic adjustable mirrors. Rear heat & air with 4 individual vents on the ceiling so everyone in back can control their own fan. Climate control. Built in DVD player with wireless headphones. You can listen to the radio or a CD up front while your kids watch a movie in the back with headphones on. 2 wireless headphones included. 3 jacks in the very back seat so you can plug in additional headphones. Nice tray between the front seats that comes in handy on long trips if you eat while driving. Remote start. Automatic side doors. Back seat folds into the floor and the 2 middle seats are removable to create a large space for hauling things. I'm pretty sure this van was built to be able to pull things (campers, boats) but I never did and I don't have a hitch on it. I replaced the timing belt 2 years ago as a preventative measure. This van always starts in the winter and it runs smoothly and beautifully, I will really miss it.

Negatives: 1. When using the remote start the doors unlock so while the van is warming up someone could get in but if they tried to drive it the engine would kill as soon as they hit the brake to put it in drive. My solution was to never leave valuables in it during the winter when I'd be using remote start.

2. I only have 1 set of keys (includes 1 key, 1 key fob, 1 remote start fob) I'm sure you could have a spare key made at a.
