I have a 2003 Dodge Caravan 3.3 leader vi. My driver side brake light is it working. I've replaced the bulb several times thinking that was the issue but it still isn't working. As I said it's only on the driver side the running lights work on the driver side but when I press the brakes it doesn't get brighter. Looking for someone who can diagnose and fix this problem for me. Looking for someone who knows what they're doing and is affordable. Thanks for looking and I look forward to hearing from you. Please text or
