

Truck amp Equipment Mechanic (Philadelphia, Pa)

Location

Pennsylvania

<https://www.genclassifieds.com/x-627454-z>

We have position open for someone that has experience with fixing trucks and heavy equipment. If you only have exp in repairing trucks and or equipment that's ok but if you have a CDL "A" and or have driving exp with dump trucks, equipment hauling etc it would be helpful to keep you working steady. Further experience in operating heavy equipment would be a plus as well. Please don't apply if you're not experienced , we don't have time to train (5 years experience should be enough in the above mentioned fields). In addition to repairing trucks & equipment we have a series of auto., pick-ups and associated smaller units i.e. air compressors, welders, generators, etc to keep u busy. The pay depends on experience. This is a good steady job for the proper person having the require.
