

# Exterior Stucco Repair amp Replacement

Location **Wisconsin**  
<https://www.genclassifieds.com/x-627660-z>

Hello,

I'm in need of a fairly large stucco repair job.  
Its a two story home with a walk up attic, the stucco is located on the 2nd floor and attic exterior walls. 1st floor is all brick.

One side of the house possibly is in need of a tear off and replacement, large pieces of stucco are starting to crack and pull away from the house.

The other three sides of the house have little spots of repair around the house. As well as a few previous fixes that doesn't blend in at all, I'd like to make those look a little better too.

It looks like the existing stucco was sprayed on.

Let me know about what you think a job like this will cost, a little about your experience and yourself, and we can set up a time to look at the job.

Thanks for your!
