I'm looking for a free aquarium for my sons fish. His tank got a crack in the back and all the water ran out of it. There is no repairing his aquarium. Now his fish are living in a bucket with no filter. He is so heartbroken and doesn't want his glow fish to die. He saved his money to buy and maintain his fish. There are 8 glow fish so he will need at least a 20 gallon tank. So if there's anybody with a free fish tank that is willing to give it to my son, we would greatly appreciate.
