

## 12 Ton FMC Link Belt Crane (4 USD)

Location

Utah

<https://www.genclassifieds.com/x-628281-z>

This is a mid to late 1980's FMC Link Belt YC-28 12 1/2 Ton capacity crane with a gas powered Chrysler engine. It is 4 Wheel Drive and has oscillating capacity which allows it to turn on a dime. The boom will extend to about 60'. This equipment was purchased by a New Mexico ski area about 15 - 18 years ago and they paid \$150,000 for it then. The hydraulic seal on the main cylinder has recently been replaced. The engine is in good condition and starts on the first crank. The tires are in acceptable condition as you can see in the photos. It needs a new drivers seat and the front plexiglass window replaced. It's original color was red which has since faded with our New Mexico sun.

This equipment would be ideal to be used on location rather than moving from site to site. Transportation can be arranged to almost anywhere in the.
