If you or someone you know is interested in learning how to play the guitar, Ukulele, or bass, give me a call send me an email or check out our Facebook page for more info!

- \$25.00 for one, one hour lesson every week (\$100 a month) (Ukulele lessons 40 minutes)
- I can bring the lessons to YOU! Learn from the comfort of your own home! We also have an awesome studio space if that works for you!
- ALL AGES WELCOME! Whether you are 6 or 60, we will design the perfect lesson plan for you!

*Beginner*Intermediate*Advanced*

I have 15 years of guitar playing experience and a strong passion for teaching music to all that want to learn!

Give me a call or shoot me an email, I would love to set up your first lesson!
Looking forward to talking with you.

Visit RESTORABLEST.com or call for more information.

Dustless blasting is a highly effective and safe way to restore marine equipment. It also eliminates any potential water quality and air quality issues that might result from a different type of process. You can use dustless blasting on steel boat restoration, aluminum boat restoration, and fiberglass boat restoration. This is a highly productive way to refinish boats and remove old paint or rust. Your boat will appear like new!

While dry sand blasting can be effective on steel vessels, dustless blasting can eliminate the pollution associated with the dry sand. On the other hand, dry sand blasting can be too harsh for other materials. For example, on aluminum, you may end up with a rough or warped surface. Because the dustless blasting system uses water, you will find that the result will be a smoother material, and even thin areas of aluminum won't get warped.

For marine work especially, containment can be difficult as things are usually out in the open. Marine dustless blasting ensures that you don't need to worry about containment as you restore boats -- the only airborne particles will be water vapor. Best of all, we work on location in the Long Island, New York, or Tri State Area! Strip years of age off of your boat, and increase its lifespan, by trying our convenient and environmentally friendly process!
