Installation Capabilities!

Satellite Installation. Installation, Upgrade, Add ons, Relocate, and Removal of Satellite Systems

Closed Circuit Television (Security Cameras)

Structured Wiring offers you the highest quality CCTV products ranging from miniature fixed lens cameras to traditional CCD cameras and state-of-the-art Digital Video Recorders.

Home Theater

Enjoy your own home theater with complete surround sound. We offer professional installation and setup of entertainment centers and media rooms, including Plasma and LCD TVs.

Voice (Telephone Systems)

Structured Wiring can efficiently distribute your telephone, fax and Internet dial-up lines throughout your home or business. This gives you the flexibility to switch locations of telephone lines without having to call the Phone Company or add new outlets. In addition, we provide and install a variety of telephone systems for your home or business including digital and IP phones.

Data

Our data wiring services offers the freedom of sharing data and broadband Internet connection anywhere in the home or business. This allows businesses to network their computers and distribute high speed Internet connection to multiple PCs in multiple locations. Most families also find this feature especially helpful as it allows family members to use the same Internet connection simultaneously without having to wait for one another.

Video Distribution

Through video distribution you can watch TV anywhere in your home including a baby monitor, front door

Cam, VCR, DVD, and satellite. For example, imagine being able to switch to a set channel in any room in the house to see the baby's crib through a camera installed in the baby's room, or view the front door cam to see whom is at the door.

Audio Distribution

Listen to your favorite music anywhere in your house from the same audio source. This is ideal for entertaining your guests inside the house or out on the patio. Moreover, business can benefit from this feature for a voice paging system, ads and announcements or to play music during business hours.

Home Automation

Home automation creates an environment in the home that is adjustable to meet the demands and changes in your lifestyle. It allows you to make changes to the state of your home from the comfort of your own couch, from your web browser at work or from your mobile telephone. Your home is never out of your reach.

Intercom Systems

Structured Wiring offers a wide range of voice/video intercom systems for your home or business. Imagine being able to talk to someone at the front door while you're upstairs or monitor the sounds from the baby's crib while you're in a different room. You can also play music through the house, call everyone for dinner, and even remotely view the front or back door cameras all from a central location.
