Looking for a responsible female to stay overnight with my child while I am working. This would be ideal for a St Mary's or any college student maybe looking for a quiet place to study in the evenings and to make a few extra bucks. This would only be for late evenings until early morning, so your only real responsibility would be to physically be in the home while child is sleeping. Child will be asleep when you arrive and I will be home early morning.

I am not looking for a nanny nor do I have the means to do so. However, as there is not to much required of you, I am hoping to work out something suitable for both of us.

If seriously interested please email me to discuss further.

Thanks for stopping by
