

# Antique Snowmachine Bodies amp Parts (1 USD)

Location

**Alaska**  
<https://www.genclassifieds.com/x-629296-z>

5 antique snowmobile bodies available with a few additional misc. parts including two unattached track guides. Could be quite a treasure trove for a collector or anyone who makes a hobby out of fixing up older machines. Make your best offer for any or all.

Four of the five lack engines. The only one with an engine is the Scorpion 340, and I haven't attempted to get it running. I don't have any paperwork on these sleds, nor do I know much about their history. I suspect they are 70s to possibly early 90s models. They were sitting on some land I purchased.

If you intend to register one or more of them and need a valid title, I'll claim title following the provisions of AS 28.11.025, since they are legally considered abandoned vehicles on private property, and transfer the title to you.

If you lack a way to haul them, I'll deliver them for free anywhere in the Anchorage area with a reasonable offer.

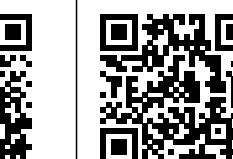

Contact info is above (call or text only).
