Why should you own a 2013 Nissan Sentra?

Edmunds said...

"It's been a while since the Nissan Sentra has been a major player in the small-sedan segment. The previous-generation car, last redesigned in 2007, has been increasingly outclassed in terms of design, features and fuel economy over the past few years. Yet the fully redesigned 2013 Nissan Sentra is a much-improved car, boasting significant improvements that should thrust this formerly forgettable sedan out of the shadows and into the spotlight.

For starters, the 2013 Sentra rides atop an all-new platform. Overall length has grown by about 2 inches,

yet Nissan says the new car is 150 pounds lighter than before. The Sentra's styling has grown up at the same time, with a design that upscales to a luxury. Undoubtedly, the car's profile silhouettes and badging language are more closely related to the similarly designed Infiniti's, the premium brand continues to evolve. With features of premium quality materials and a more refined, sophisticated look, the Sentra is a luxury car. It also frees up more amounts of extra passenger space in the trunk space.
