I'm looking to hire someone on a commission basis for my business. I need someone with experience in sales/marketing, graphic design, and general business knowledge. I'm a photography company that's looking to grow and become a staple in the Metro Detroit area.

There's plenty of work to do and I need help doing it. Photographers, visual artists, sales people, booking agents, the whole nine yards. I don't need you to be proficient in everything, just enough to make this work. Once the business is stable, then hourly plus commissions will go into effect. As of right now, I can only do pure commissions.

Please email me a resume THEN call promptly.

Thank you for reading
