If u meet a girl named kristin her last name is something with an M. I met her at the park on williams. Run the other way. She has herpes. I found out after we had sex. She said she didn't tell me before because she really liked me. If u had sex with this chick, get tested. You need help, you're sick in the head. And nobody should ever be taken advantage of like that. I think u should seek some type of mental help anyone who could knowingly do that to another human being is not.
