I'm a small business owner who needs some additional hands on deck to handle a myriad of tasks related to running online stores and growing merchandising operations around my (celebrity) clients brands.

Looking for a few solid people to try some initial projects with to see how well we work together.

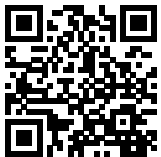

- * Need serious tech skills
- * You must be an entrepreneur who has been involved in several projects - success or failures.
- * You HAVE TO BE extremely detail orientated.

- 1) Send me your portfolio/resume so I can see what you know, what you do and your skills in action.
- 2) What sort of compensation you're seeking.
