I go by Phuture Hi Def .I am a rapper/Guitar player/ Singer. Right now I am just experimenting and not really looking for a collaboration but an audience. I would collaborate but as of right now I am busy with work lack of transportation. I would however collaborate if someone has a beat they would like me to be in. I have my own personal studio so I can make some time to record something.

Here is the Link to a song called >YOU< produced by KAS and Rapped by me Phuture Hi Def. Kas makes amazing beats so you can hit em up as well.
