

# Run Trailer wiring for Reverse Lights (Ballwin MO)

Location **Missouri**  
<https://www.genclassifieds.com/x-630788-z>

I bought a new trailer, really like it, but last night I noticed at night I couldn't see a damn thing! no reverse lights? ??

I looked at the 7 pin connector on the trailer and there are only 5 wires coming out of it, so it doesn't look like they have wiring even run for it.

I can drill the back of trailer or dremel out a hole to mount and install the lights, just want someone to come and run the wiring so it will work when I'm ready to install lights.

I already have trim down inside the trailer; so ALL wiring is exposed

I just am not sure what connectors I have to go to to get it to work

If you can even walk me through it on the phone I'll paypal you some cash. Just tell me what to test (with a voltage tester) and then hook up to. if it works then I'll send you some cash.
