Seeking alternative knowledge (Southside VA)

Looking for somebody doing solar, container or tiny housing,, stealth RV Boondocking, aquaponics or off-grid living willing to share knowledge, local guy, well-known in my small town, safe, references

just looking for some like-minded people who see the need for a Plan B
the end of our consumer society
the end of the middle class

I'm not very handy or mechanical, hence the search
maybe you, like me, would just like to network alittle, make a new friend
I seek nothing but friendship and the sharing of knowledge and information
I'm quite stable in all regards, so no worries

lets chat, maybe meet over a coffee
life is boring among the sheeple and sleep
