

# Get paid to have pretty nails

**jamberry**  
NAILS

**What are Jamberry Nails?**

The wraps are a solid film covering that can be applied directly to the nail to achieve a look not found anywhere else. This special material is both pressure and heat activated to create a water tight bond to your nail. The shields are made in the USA, with no harsh chemicals and are latex free.

This new nail treatment can be applied in about fifteen minutes at home. With over three hundred styles to choose from, these designer wraps are made to last up to two weeks on fingers and four or more on toes. Unlike traditional nail polish, they won't chip and require no drying time. It's so easy to achieve a professional, salon look at a fraction of the cost.

Jamberry Nail Wraps are the newest way to accessorize your fingers and toes.

Get your own unique, professional nail design and say "goodbye!" to nail polish. With today's hottest celebrities already wearing unique nail designs, it's quickly becoming a fashion "must have."
