

Netherland dwarf rabbits (Belleville)

Location **Missouri**
<https://www.genclassifieds.com/x-631363-z>

Looking for a new furry friend ?

Netherland dwarfs are the smallest rabbit breed in the world. They weigh anywhere between 1.1lb-3.5lb (my rabbits are in the 2lbs range, so that's how much their babies should weigh.) Despite being smaller than most breeds, they are active and need room to run around. I breed for best temperance possible, my rabbits are all tame, loving and cuddly. I have been raising rabbits for 10 years, Netherland dwarfs for almost 2.

i'm a small rabbitry with 20+ rabbits

I have the following colors ;

black otter

silver marten

black

chocolate otter

charlie marked

and broken black.

My baby buns are normally always black otter.

I have a few rabbits available currently

1 black otter doe

1 black buck

1 charlie marked buck.

~~they are \$30 each, or \$50 for 2~~

His overall quality can be shown by how he shows
 up in the recently concluded championship and in other high-level reserved games. He is
 still showing in AFA very soon.

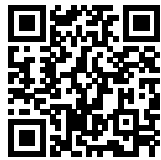

I have a litter of 3, out of my best stock!

plan on keeping the does from the litter, but I do sell the bucks. These will be great snow quality. So there are more than pet prices will range from \$50-\$75 depending on how they look where they get a little order.

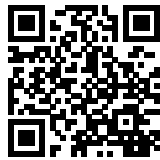

Feel free to contact me about my rabbits. We can easily set up a time for you to come pick out your bunny.
: Thank you !
