I have a project I am working on and have a few modules which need to be compiled together. If you are GOOD and can work onsite I'll pay for the hourly work or delivery in cash and today/Monday/Tuesday onsite.

Ready? Send me your details (you can also remain anonymous) because I'm paying in cash.

I'm also going to need an app developed so that will take longer but the framework will be ready.

Let's do it and I'll by the beer - can work from the Casino bar area, a DEFCON breakout room (I have registered) or my suite.

Specs include:

- network port routing
- dns and api protocol
- postfix recompile
- design / user
