We have been helping clients since 2006, and in that time we have prepared hundreds of business plans; so we know what investors want to see.

Most everyone knows that a business plan is frequently used to acquire funding, but there is much more it can provide you, the business owner. It will help differentiate your business by answering specific questions. Many businesses fail because the owners do not notice when their business is headed in the wrong direction; until it is too late. Having a business plan would help stop this from happening.

Typically our plans are 25 to 35 pages in length and contain all of the information investors want to see. Those seeking a plan for strategic growth; well we can help there too. Your plan will cover a number of topics including:

- â€¢ SWOT Analysis
- â€¢ Executive Summary
- â€¢ Demographics
- â€¢ Graphs/Charts
- â€¢ Management Profile
- â€¢ Objectives
- â€¢ Competitive Analysis
- â€¢ More

All plans include complete financials, research, and revisions. The price of your plan will depend on the type of business, and several other factors. Typical prices range from \$450 to \$1,200 for a full business plan, with most averaging \$450 to \$650.
